

DECORATIVE FRAME ACCESSORY COMPATABILITY CHART

For the Decorative Frame accessory to properly fit it must completely cover the bezel on the display.

The frame will fit the display if the top, side and bottom bezels on display all measure less than 4 1/2" (114mm).

Use the figure below and the Display Compatability Tables on page 2 to determine if frame will work with display.

To make sure frame fits a particular display:

1. Measure width of upper bezel on display.
2. Measure the distance from the top of display to the inside of the upper bezel (Edge of screen).
3. Record measurement.
4. Measure width of side bezels on display.
5. Measure the distance from the right or left of display to the inside of the right or left bezel (edge of screen).

NOTE: Right and left bezels should be the same so only one side needs to be measured.

6. Record measurement.

NOTE: The left and right side bezels will be the same width so you only have to do this on one side of your TV.

7. Measure the width of lower bezel on display.
8. Measure the distance from the bottom of display to the inside of the bottom bezel (edge of screen).
9. Record measurement.

Depending on the brand and model of display, this measurement may or may not be the same as the width of the upper bezel.

TELEVISIONS MAXIMUM ALLOWABLE DIMENSIONS		
Diagonal Dim.	Height (inches / mm)	Width (inches / mm)
32	23 31/32 (609mm)	37 3/32 (942mm)
42	28 57/64 (734mm)	45 13/16 (1164mm)
50	32 27/32 (834mm)	52 25/32 (1341mm)
